

ANTON GAYEVOY

Senior Full Stack Engineer

anton.bay.ms@gmail.com • <https://www.linkedin.com/in/anton-bay-ac/> • Montreal, Canada

Experience

Tkxel

Reston, VA

Senior Full Stack Engineer

06/2021 - 04/2024

- Worked on agile Scrum teams developing various projects for the company
- Fully engaged in Agile SDLC, using Jira for seamless collaboration across all phases: Planning, Develop, Testing, and Deployment
- Developed the frontend of an e-commerce platform using React, Tailwind CSS, and Next.js, and built microservices with Node.js
- Improved SEO and search functionality with Next.js and Elasticsearch
- Implemented Test-Driven Development (TDD) practices in software development projects, using Jest, Cypress, and Enzyme
- Utilized AWS EC2, S3, and RDS services for the e-commerce platform and built serverless backend with AWS Lambda
- Developed an e-commerce platform using Angular and Node.js from scratch, integrating third-party APIs such as Bitpay API
- Utilized expertise in React and Ruby on Rails on the DApps for an NFT Marketplace, and integrated smart contracts using web3.js
- Employed GraphQL schemas and optimized SQL queries to improve application performance
- Conducted code reviews, provided constructive feedback, fostering a collaborative and quality-focused development environment

Bitsrain

Springfield, MA

Full Stack Engineer

06/2017 - 05/2021

- Migrated legacy Angular JS codebase to Angular utilizing Angular CLI for migration tasks
- Implemented data visualization components in multiple React projects using libraries such as D3.js, Chart.js
- Closely worked with Project Manager to optimize existing services and create the best possible user experience
- Created REST APIs and Integrated 3rd party services including PRIME-TRUST and OWS on the back-end side with Node.js
- Built the mobile app and desktop app with React-Native (Trading Desk mobile app) and ElectronJS
- Employed webpack for efficient module bundling and static asset optimization, alongside AWS EC2 for deployment
- Built an internal use admin web application from scratch using React and Node.js

Zappos

Las Vegas, CA

Full Stack Developer

10/2015 - 03/2017

- Worked on a team of developers migrating Zappos's e-commerce platform from jQuery and Laravel to React and Ruby on Rails
- Implemented pixel-perfect web UI with Bootstrap and leveraged Redux and Context for streamlined state management
- Created custom web components using JavaScript, React, and Material UI
- Wrote unit tests and end-to-end tests using Jest and Cypress, and used Jenkins for tasks related to building, testing, and deploying
- Optimized backend leveraging optimization techniques, such as indexing, caching with Redis, connection pooling
- Worked on a continuous deployment workflow using Docker, Heroku, and Nginx and created some RESTful APIs
- Crafted and Deployed a greatly optimized REST API from analysis of existing project
