# ANTON G. VOY

## Senior Full Stack Engineer

📞 +1 (343) 544-0135   @ anton.bay.ms@gmail.com   🔗 https://antonvoy.github.io/
📍 Montreal, Canada

## EXPERIENCE

### Senior Full Stack Engineer
07/2023 - 05/2024

#### Fiveable
- Developed Fiveable's online learning platform designed to help students prepare for their AP exams utilizing React, Ruby on Rails, PostgreSQL, and AWS
- Created a custom content management system (CMS), and implemented web components for user-friendly UI, ensuring compliance with WCAG standards
- Implemented a chat and video streaming system for virtual group studying and events using technologies like WebRTC, enhancing collaboration and engagement
- Contributed to the development of a proprietary analytics dashboard, enhancing the platform's capability to track and analyze student learning outcomes

### Senior Full Stack Engineer
06/2022 - 06/2023

#### Give Lively
- Built fundraising platforms with React and Ruby on Rails to help non-profits raise money for their causes through digital campaigns, event ticketing, and peer-to-peer fundraising
- Created a secure and transparent payment transaction system by integrating 3rd party APIs like Stripe, Google Pay, Apple Pay, PayPal, and ACH Payment API
- Implemented high effective UI and user-friendly donation widgets, ensuring accessibility and donation processing efficiency
- Developed integrations between Salesforce and GiveLively's core platform, enabling real-time data exchange and streamlining donor management processes

### Full Stack Developer
07/2020 - 05/2022

#### MyTime
- Worked on an Agile Scrum team responsible for upgrading MyTime's Scheduling and Management platform using modern technologies like React and Ruby on Rails
- Developed MyTime's user interface, implementing responsive design principles and enhancing user experience and engagement
- Integrated third party APIs, expanding MyTime's capabilities in payment and calendar and sales synchronization with social media platforms and QuickBooks
- Designed and deployed scalable cloud-based solutions, ensuring high availability and performance during peak usage using Amazon Web Services

### Full Stack Developer
09/2016 - 06/2020

#### Bitsrain
- Developed an Agency Platform which connects authors and publishing professionals utilizing technologies like React, Ruby on Rails, MongoDB, and Amazon Web Services
- Leveraged expertise in React and Ruby on Rails in migrating an e-learning platform from Angular.js and Laravel to React and Node.js
- Wrote unit tests and end-to-end tests using Jest, Enzyme, Cypress, and used Jenkins for tasks related to building, testing, and deploying
- Conducted code reviews, provided constructive feedback, fostering a collaborative and quality-focused development environment

## SUMMARY

Proficient in Ruby on Rails and React.js with strong command on web applications. Passionate early-adapter of technologies and could "wear many hats". Excels in problem-solving, creative thinking, and collaboration.

## SKILLS

### Language
JavaScript · TypeScript · Ruby

### Framework
React.js · Next.js · Angular ·
Ruby on Rails · Node.js

### Database
MySQL · PostgreSQL · MongoDB

### CI/CD
Amazon Web Services · Jenkins ·
Microsoft Azure · Docker · Kubernetes

### Tools & Platforms
Jira · Git · Bitbucket · Webpack

## EDUCATION

### Bachelor's Degree
Université de Montréal
09/2012 - 08/2016     Montreal, Canada
